* Represent substantial changes in data sources or calculation of the measure that would affect year-to-year comparisons. Please refer to the County Health Rankings & Roadmaps to find out more about the indicator changes.

This document was prepared by the staff at the Kansas Health Institute. If you would like more information about County Health Rankings & Roadmaps, please contact Tatiana Lin at (785) 233-5443 or email at tlin@khi.org.

http://www.countyhealthrankings.org
The annual County Health Rankings provide a snapshot of the health of Kansas counties. The Rankings are made up of two summary scores: Health Factors (which measure issues that can shape the health outcomes) and Health Outcomes (which measure disease and deaths). The following tables illustrate this county’s “drivers,” or measures with the greatest impact on a county’s ranking position.

### Health Factors: Drivers with greatest impact on ranking, Jackson County, KS — 2018

<table>
<thead>
<tr>
<th>Measure</th>
<th>Description</th>
<th>Factor Category</th>

</tbody>
</table>

**NR:** Measure (e.g., premature death) could not be reported for this county.

**Green Plus:** Measure with a positive impact on a county’s ranking position.

**Red Minus:** Measure with a negative impact on a county’s ranking position.

**Technical Note:** The state values are only provided as a point of reference. They have not been used in the determination of counties’ rankings or top drivers for health outcomes and health factors.
