Informing Policy. Improving Health.

The annual *County Health Rankings* provide a snapshot of the health of Kansas counties. The *Rankings* are made up of two summary scores: **Health Factors** (which measure issues that can shape the health outcomes) and **Health Outcomes** (which measure length and quality of life). The following tables illustrate the “drivers,” or measures with the greatest impact on ranking position, for this county.

**What do these drivers mean?**

The drivers indicate the measures with the greatest impact on the ranking position. Drivers labeled with a green plus sign are measures on which the county performed particularly well. Drivers labeled with a red minus sign indicate priority areas which, if improved, could have the greatest impact on improving the rankings of the county.

**Health Factors: Drivers with greatest impact on ranking, Barber County, KS – 2019**

	Measure	Description	Factor Category	County Value	State Value	Impact on Rankings
1	Adult smoking	% of adults who are current smokers	Health Behaviors	17%	17%	—
2	Income inequality	Ratio of household income at the 80th percentile to income at the 20th percentile	Social and Economic Environment	5.5	4.3	—
3	Unemployment	% of population age 16 and older unemployed but seeking work	Social and Economic Environment	2.9%	3.6%	+
4	Adult obesity	% of adults age 20 and older that report a BMI ≥ 30	Health Behaviors	32%	33%	+
5	Some college	% of adults age 25-44 with some post-secondary education	Social and Economic Environment	56%	70%	—

**Health Outcomes: Drivers with greatest impact on ranking, Barber County, KS – 2019**

	Measure	Description	Outcome Category	County Value	State Value	Impact on Rankings
1	Premature death	Years of potential life lost before age 75 per 100,000 population	Length of Life	8688	6944	—
2	Low birthweight	% of live births with low birthweight (< 2,500 grams)	Quality of Life	5.9%	7.1%	+
3	Poor mental health days	Average # of mentally unhealthy days reported in past 30 days for adults	Quality of Life	3.3	3.3	+
4	Poor physical health days	Average # of physically unhealthy days reported in past 30 days for adults	Quality of Life	3.2	3.1	—
5	Poor or fair health	% of adults reporting fair or poor health	Quality of Life	15%	15%	+

**NR:** Measure (e.g., premature death) could not be reported for this county.

**+ Green Plus:** Measure with a positive impact on a county’s ranking position.

**— Red Minus:** Measure with a negative impact on a county’s ranking position.

**Technical Note:** The state values are only provided as a point of reference. They have not been used in the determination of county rankings or top drivers for health outcomes and health factors.
