Informing Policy. Improving Health.

The annual *County Health Rankings* provide a snapshot of the health of Kansas counties. The *Rankings* are made up of two summary scores: **Health Factors** (which measure issues that can shape the health outcomes) and **Health Outcomes** (which measure length and quality of life). The following tables illustrate the “drivers,” or measures with the greatest impact on ranking position, for this county.

What do these drivers mean?

The drivers indicate the measures with the greatest impact on the ranking position. Drivers labeled with a green plus sign are measures on which the county performed particularly well. Drivers labeled with a red minus sign indicate priority areas which, if improved, could have the greatest impact on improving the rankings of the county.

Health Factors: Drivers with greatest impact on ranking, Stanton County, KS – 2019

	Measure	Description	Factor Category	County Value	State Value	Impact on Rankings
1	Adult smoking	% of adults who are current smokers	Health Behaviors	14%	17%	NR
2	Adult obesity	% of adults age 20 and older that report a BMI ≥ 30	Health Behaviors	37%	33%	NR
3	Food environment index	Index of factors that contribute to a healthy food environment, (0-10)	Health Behaviors	9.2	6.9	NR
4	Physical inactivity	% of adults age 20 and older reporting no leisure-time physical activity	Health Behaviors	30%	24%	NR
5	Access to exercise opportunities	% of population with adequate access to locations for physical activity	Health Behaviors	72%	80%	NR

Health Outcomes: Drivers with greatest impact on ranking, Stanton County, KS – 2019

	Measure	Description	Outcome Category	County Value	State Value	Impact on Rankings
1	Premature death	Years of potential life lost before age 75 per 100,000 population	Length of Life		6944	NR
2	Poor or fair health	% of adults reporting fair or poor health	Quality of Life	17%	15%	NR
3	Poor physical health days	Average # of physically unhealthy days reported in past 30 days for adults	Quality of Life	3	3.1	NR
4	Poor mental health days	Average # of mentally unhealthy days reported in past 30 days for adults	Quality of Life	3	3.3	NR
5	Low birthweight	% of live births with low birthweight (< 2,500 grams)	Quality of Life	6.9%	7.1%	NR

NR: Measure (e.g., premature death) could not be reported for this county.

+ Green Plus: Measure with a positive impact on a county’s ranking position.

- Red Minus: Measure with a negative impact on a county’s ranking position.

Technical Note: The state values are only provided as a point of reference. They have not been used in the determination of county rankings or top drivers for health outcomes and health factors. For more information on the calculation of score and rankings, please visit: <http://bit.ly/CHRzscores>.
