Note: Children living in families with incomes below 241 percent of FPL (\$59,286 for a family of four in 2017) may qualify for Medicaid/CHIP.

Regions are designated using the Kansas Department of Health and Environment District Office Boundaries map.

Percent of children age 0-18 enrolled in KanCare (Medicaid/CHIP) is calculated using average monthly enrollment of children and dividing by the total number of children.

The Small Area Health Insurance Estimates (SAHIE) program was created to develop model-based estimates of health insurance coverage for counties and states. SAHIE is the only source of single-year estimates of health insurance coverage for all counties in the US. SAHIE uses information from the American Community Survey (ACS), demographic population estimates, aggregated federal tax returns, records for the Supplemental Nutrition Assistance Program (SNAP), County Business Patterns, Medicaid, Children's Health Insurance Program (CHIP) records, and decennial Census to calculate estimates.
