

KMMC Informational Questions

DRWG Questions (11):

KMMC Domain	Question	Resp Party
Social Determinants of Health, Employment, Quality of Life	91. What data are being collected for SDOH?	
Social Determinants of Health, Employment, Quality of Life	91b. How do providers use the data to support provision of health care? What about the health plans? KanCare - at the state agency level?	
Social Determinants of Health, Employment, Quality of Life	92. What data are being collected as SDOH and how are the data being used to support patients in their care?	
Quality and Outcomes	52. What HEDIS or other quality metrics are tracked by the KanCare program? What portion of provider or MCO profit is void if those entities fail to meet quality standards? What accreditation or credentialing is done for the KanCare program? How does this compare to other state Medicaid programs?	
Access and Coordination of Care	50. I have shared some comments with KHI staff regarding information that is put into the UB-04 claim that might be helpful in identifying a number of issues, including access to care. The source of admission (did the patient walk in, were they brought in by ambulance, etc.) and the discharge disposition (did the patient go home, were they transferred to another facility, did they go to a nursing home, did they go to a psych facility, etc.) might be used to help identify access issues. However, I don't know if the source of admission or the discharge disposition is a field that is included in the encounter data that the MCOs report to KDHE.	
Eligibility Determination, Enrollee Characteristics, Enrollee Satisfaction	1. KDHE regularly reports "applications/reviews that take longer than 45 days" to the legislature. What data is included when this is reported?	
Eligibility Determination, Enrollee Characteristics, Enrollee Satisfaction	7. How does the data rank the factors that impact the eligibility determination?	
Eligibility Determination, Enrollee Characteristics, Enrollee Satisfaction	11. Demographics (race/ethnicity, income, etc.) 12. How do enrollees break down by county or state legislative district? What are ages, genders, languages spoken and types of members in various areas of the state? What are the various personas of the enrollees? (e.g. child, mom, elderly) 13. What are the characteristics of the persons enrolled in KanCare, including age, race, gender, education, employment, income, etc.	

KMMC Domain	Question	Resp Party
	<p>14. What are the characteristics of the persons enrolled in KanCare in addition to income? Age, Race, Gender, Education, employment and at what capacity are they employed. (and so on)</p> <p>15. Rank the common characteristics by age, geographic area and diagnosis.</p> <p>16. How many Enrollees are from other ethnic origins?</p>	
Eligibility Determination, Enrollee Characteristics, Enrollee Satisfaction	69. How is enrollee satisfaction currently measured? Is there independent data collection of consumer satisfaction of MCO services?	
Utilization and Expenditures	18. How is utilization measured and calculated (particularly inpatient utilization)?	
Utilization and Expenditures	34. How are Health Care Expenditures defined?
