

What This Measures:

Graduation rate of Wichita Unified School District (USD 259) students by race, ethnicity and sex.

GRADUATION GAP

Overall, about 4 in 5 Wichita Unified School District (USD 259) students graduated during the 2021-2022 school year. However, graduation rates were lower for Black male students.

Graduation Rate in Wichita Unified School District (USD 259) by Race, Ethnicity and Sex, 2021-2022 School Year

Note: Overall graduation rate (all students) for Wichita Unified School District = 80.4 percent. Overall graduation rates include Hispanic, White, Black, American Indian or Alaskan Native, Native Hawaiian and Pacific Islander, Asian, and multi-racial students. This data is from a four-year cohort study. The cohort study follows students from 9th grade – 12th grade to calculate graduation rate. Students who transferred in or out, immigrated or died have been accounted for in each four-year cohort.

Why this is important: There's a strong connection between education and health — for example, higher levels of education are linked to increased economic stability and a lower risk of death later in life. *The Healthy People 2030 national health target is to increase the proportion of high school students who graduate in four years to 90.7 percent.*
