

# Coffey County

An accessible version is available upon request from [info@khi.org](mailto:info@khi.org)

Each Kansas county with sufficient data is represented by a dot, placed on a continuum from least healthy to healthiest in the nation.

The color of each dot represents groups of counties nationwide with similar **Population Health and Well-being** or **Community Conditions**.

**County Health Rankings & Roadmaps**

# Coffey County

The County Health Rankings & Roadmaps data release provides a snapshot of the health of each county in two summary scores: **Community Conditions** (which measure issues that can shape population health & well-being) and **Population Health & Well-being** (which measures length and quality of life). Each county is placed on a continuum from least healthy to healthiest in the nation and is categorized into a health grouping of counties with similar summary scores. The following tables illustrate the “drivers” for the health of this county.

## What do these drivers mean?

The drivers indicate the measures with the greatest impact on the health of the county, according to the CHR&R model of health and county performance. Drivers labeled with a green plus sign are measures where the county performed better than the average of counties nationwide. Drivers labeled with a red minus sign could be improved and may warrant additional attention.

### Population Health and Well-being: Drivers with the greatest impact on health, Coffey County, Kansas - 2025

	Measure	Description	Factor Category	County Value	U.S. County Avg.	Direction of Impact
1	Premature Death	Years of potential life lost before age 75 per 100,000 population (age-adjusted).	Length of Life	7,566	10,395	+
2	Low Birth Weight	Percentage of live births with low birth weight (< 2,500 grams).	Quality of Life	6.3%	8.4%	+
3	Poor Physical Health Days	Average number of physically unhealthy days reported in past 30 days (age-adjusted).	Quality of Life	4	4	+
4	Poor Mental Health Days	Average number of mentally unhealthy days reported in past 30 days (age-adjusted).	Quality of Life	5	6	+
5	Poor or Fair Health	Percentage of adults reporting fair or poor health (age-adjusted).	Quality of Life	19%	20%	+

### Community Conditions: Drivers with the greatest impact on health, Coffey County, Kansas - 2025

	Measure	Description	Factor Category	County Value	U.S. County Avg.	Direction of Impact
1	Children in Poverty	Percentage of people under age 18 in poverty.	Social and Economic Factors	11%	19%	+
2	Child Care Cost Burden	Child care costs for a household with two children as a percent of median household income.	Social and Economic Factors	16%	29%	+
3	Library Access	Library visits per person living within the library service area per year.	Physical Environment	13	3	+
4	Some College	Percentage of adults ages 25-44 with some post-secondary education.	Social and Economic Factors	68%	59%	+
5	Preventable Hospital Stays	Rate of hospital stays for ambulatory-care sensitive conditions per 100,000 Medicare enrollees.	Health Infrastructure	1,351	2,827	+

**N/A:** Not applicable due to insufficient data.

**+ Green Plus:** County performed better than the average of counties in U.S.

**- Red Minus:** County performed worse than the average of counties in U.S.

The top five drivers are determined by using the county performance relative to the average among counties in the U.S. and the measure weight for each measure. The U.S. County Average (Avg.) in the tables above is based on analysis by KHI. The U.S. County Avg. may differ from the value for the entire U.S. population on the front page. The Direction of Impact indicates whether a county performed better (+) or worse (-) than the average of counties in the U.S. The Direction of Impact is not determined for counties with insufficient data.
