FOOD INSECURITY RATES AMONG CHILDREN IN KANSAS, 2017-2022

1 in 5
children were food insecure in 2022, returning to pre-pandemic levels.

Note: All Kansas children in 2022 = 688,115. During the COVID-19 pandemic, financial assistance programs were temporarily expanded. In 2022, food costs increased sharply and some of these program changes ended. Food costs rose 12% between December 2021 and December 2022. Program changes included, for example, the expanded child tax credit that expired in December 2021 and SNAP emergency allotments that ended in February 2023.
