## FOOD INSUFFICIENCY OF KANSAS ADULTS, 2024

### Adults Overall

6.7%

3.3%

10.0%  
Food Insufficient

### Adults with Children

11.2%

3.0%

14.2%  
Food Insufficient

Food Sufficient

Sometimes Not Enough to Eat

Often Not Enough to Eat

**1 in 7**  
adults with children sometimes or often do not have enough to eat.

**Note:** In 2024, the estimated population of all Kansas adults was 2,171,862; and 729,487 for adults in households with children. Respondents were surveyed on the household level and responses were weighted for population estimates for adult population age 18 or older. On the Household Pulse Survey, respondents were asked, “In the last 7 days, which of these statements best describes the food eaten in your household?” Response options included, “Often not enough to eat,” “Sometimes not enough to eat,” “Enough of the kinds of food wanted,” “Enough food, but not always the kinds wanted,” and the option to not provide a response. Participants also were asked: “How many people under 18 years-old currently live in your household?”
