What this measures:
Share of household income paid in state and local taxes by income group in Kansas.

Percent of Kansas Total Income Spent on State and Local Taxes by Income Group, 2023

Source: (Figure and Narrative) Institute on Taxation and Economy Policy (ITEP), Who Pays? 7th Edition, 2023.

Households with the lowest incomes

(bottom 20 percent) pay about 11.4 percent of their income in state and local taxes, while households with the highest income (top 1 percent) pay about 7.5 percent.

Low- and middle-income households in Kansas pay a higher share of their income in state and local taxes than higher-income households. Because lower-income households have less discretionary income, higher effective tax rates add to financial strain.
